FOR THE MICRODASYS MD-690A !

MicroDaSys is pleased to offer the famous Microsoft BASIC for our MD-690A CPU board. This powerful BASIC provides all of the features for which Microsoft is famous, including string arrays, extensive string functions, Peek, Poke, Wait and Continue, direct execution of statements in the calculator mode, 10 nested machine language subroutines, multidimensional arrays, execution speed 8 to 10 times faster than the South West Technical BASIC, and much more. Yet Microsoft BASIC resides in only 7K of memory.

In addition, Microsoft BASIC gives you language compatibility between most popular microcomputers. Any program written in Microsoft BASIC (this includes Apple, Pet, Radio Shack, SOL and numerous others) can now be implemented on the MD-690A CPU and MicroDaSys SYSTEM.

Take advantage of this opportunity to make the best CPU on the market even better...give it the most widely supported language in the microcomputer field.

Microsoft BASIC for the MD-690A is available only from MicroDaSys. This software package is available on cassette tape for immediate loading on your MD-690A using its ultra-fast cassette interface and MONBUG. At 2400 baud, you will be up and running in Microsoft BASIC in just 40 seconds!

**ORDER NOW!** Microsoft BASIC for the MD-690A . . . . . \$39.95

- Shipped Post Paid
- Complete Documentation Included

..... clip off bottom portion and mail in with your order.....

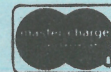

PLEASE SEND \_\_\_\_\_ MICROSOFT BASIC TAPE(S) @ \$39.95 = \_\_\_\_\_  
 Calif. Residents add 6% tax @ 2.40 = \_\_\_\_\_
