

The following complete list of TYMNET dialup numbers is updated monthly per TYMNET published revisions. Any interim updates are posted on the SUMEX.BBD under the topic NETWORK.TYMNET.

To report problems, call SUMEX Monday - Friday between 8 am and 5 pm (PST) at (415) 497-5118. To report problems at any other times, including weekends and holidays, call (800) 336-0149 (from within Virginia, (703) 442-0145).

(FEX) = foreign exchange lines. All are available for public usage. Many are multiple-line rotaries in-hunting. Usage of these lines is charged to SUMEX as is all domestic TYMNET usage.

A node with a 1200 baud rate is so indicated in (). If the baud rate is followed by "VADIC," you will require a Vadic modem; otherwise, the dialup number is for use with a Bell modem (212 or 2025). A new three-in-one Vadic modem is indicated by an "*" (it handles either Bell or Vadic 1200 baud and standard 300 baud transmission). If no baud rate is shown in (), the node has a 300 baud rate. Note that the Tymnet request for "Terminal Identifier" is not related to speed but to terminal type (A for video, E for thermal type, etc.).

The list also includes international nodes. A prospective user must contact the international carrier for a given node and set up an individual user account to gain access to international lines. The cost for usage of international nodes is borne by the individual user, not SUMEX. For further information see <DOC>TYMNET.INTERNATIONAL or call Anne Fadenrecht/SUMEX at (415) 497-5141 or sndmsg to <FADENRECHT>.
