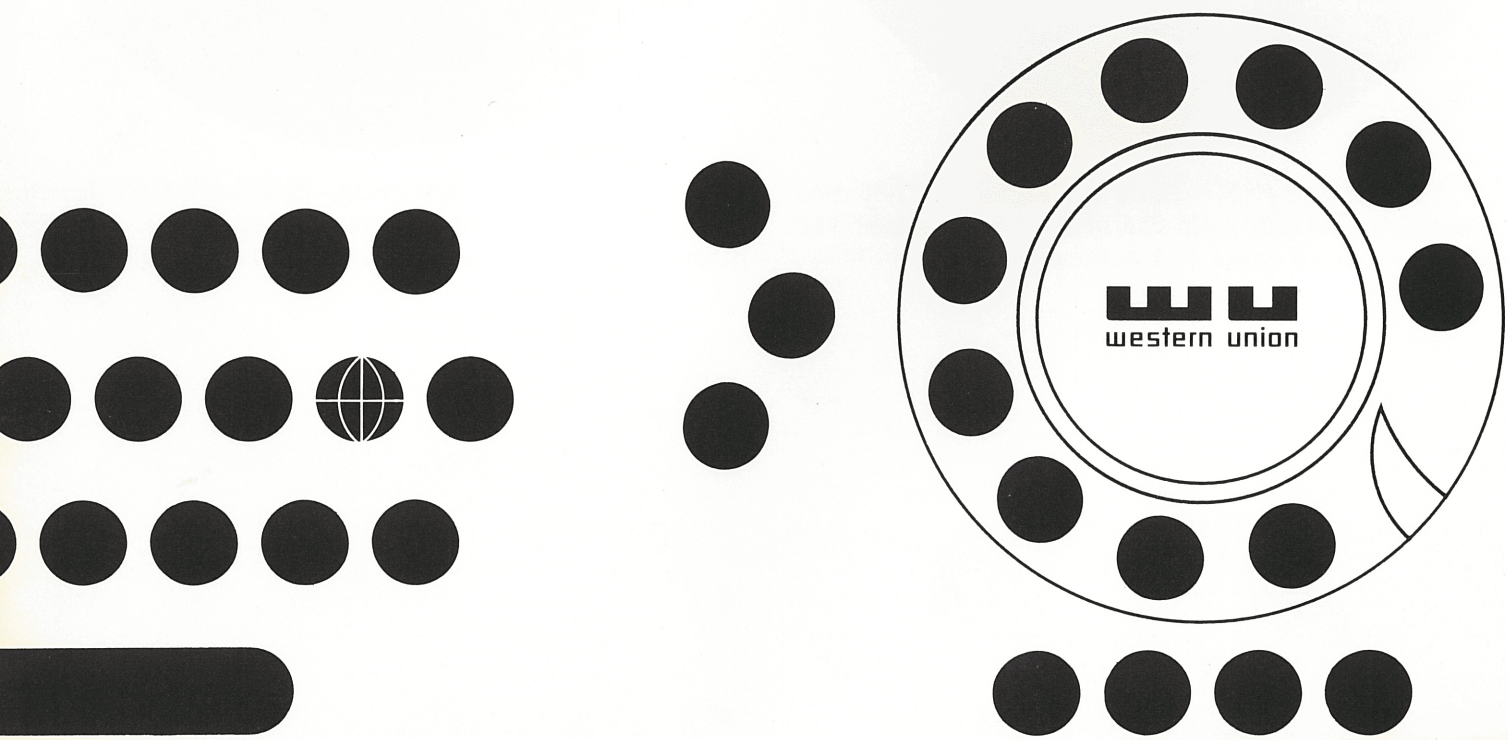
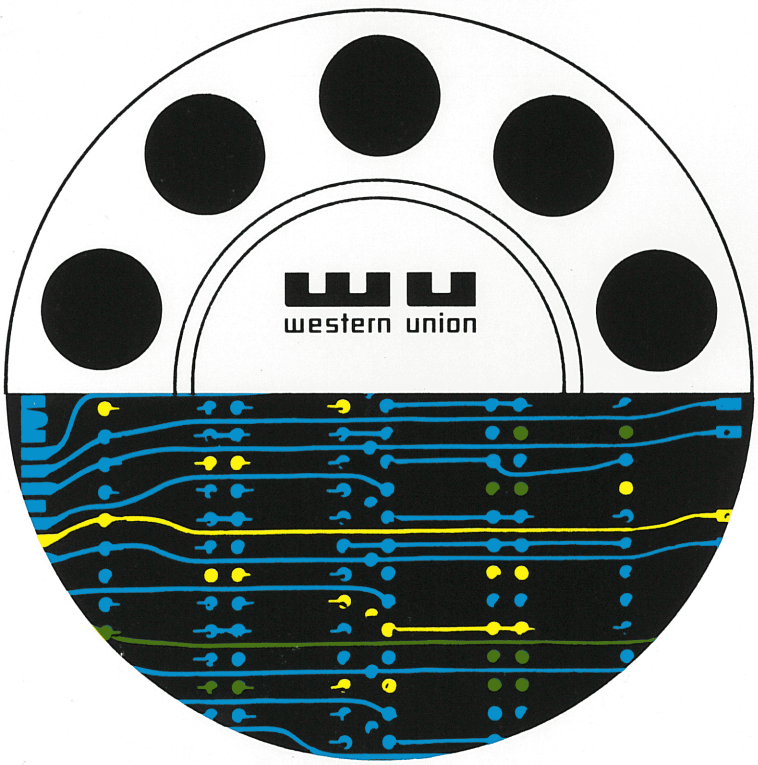
TELEX

Computer Communications Services



Now you can extend your communications reach by simp

Western Union's Computer Communications Services can satisfy your communication needs FASTER, ACCURATELY and at LOW COST. Here are some of the ways Western Union can put the nation's business, *your business,* right at your fingertips:



TWX CONNECTIONS — Send messages to TWX teleprinters equipped with multi-character answer-backs. The computer will make direct connections for you.

TELEGRAMS—Send a Fast Telegram or Night Letter to *anyone* in the United States. Your message will be computer-switched to its destination.

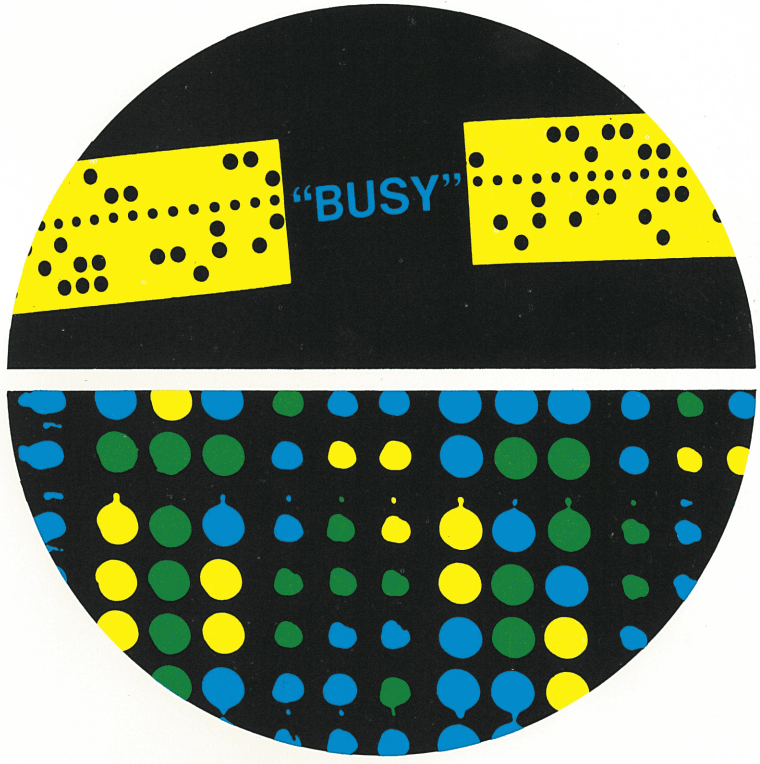
COLLECT TELEX SERVICE—Send a Collect Message to any TELEX subscriber in the United States. The computer will relay the message and handle the billing.

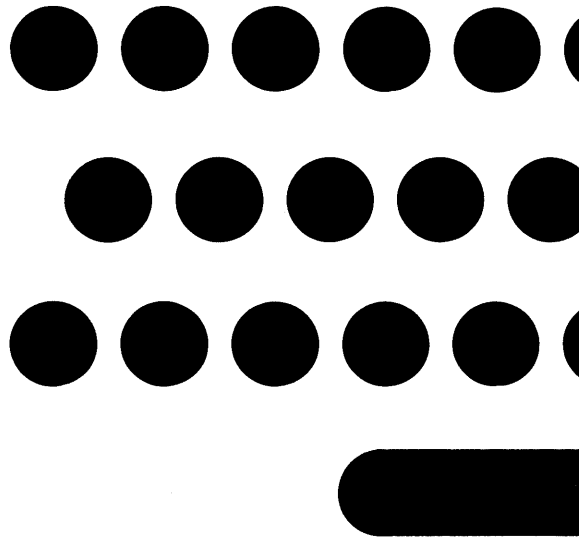
ly dialing the Western Union Computer.

MULTIPLE ADDRESS—Send the message to an unlimited number of locations. All the computer needs is the basic text and list of addresses. The computer will accept combinations of Telegrams, TWX and TELEX messages.

ITEMIZED BILLING—Receive a monthly statement identifying each call and its duration.

BUSY STATION SERVICE—Send your message to the computer when the station you are trying to reach is "busy." The computer will transmit your message for you when connection can be made.





COMPUTER DIALING SERVICE—Send all your messages on one connection to the computer. No need to disconnect and redial.
