### Problem

When a fixed length file with a record length of 128, 64, 32, 16, 8, 4, 2, or 1 is closed, with the last record of the file being the last record of a physical sector, an Error 50 (Invalid Space Descriptor) will be generated. This error appears in BASIC as "IE" Error; if the user does "PRINT ERRS\$", BASIC will show that the error was TRSDOS Error 50.

### Solution
