Problem

Page 15 of the manual has errors in it. Note the following corrections and enter them in your manual.

Solution

The third paragraph from the top should read as follows.

After you enter the last table, press <F1> twice to return to the State Tax Menu. You should make a copy of your tax tables for your files, so press <2>. You can only print your tax tables before they are filed.

The eleventh paragraph from the top should read as follows.

Note: Oklahoma and South Carolina require a special edit before continuing. See page 3 of the Oklahoma tables and page 1 of the South Carolina Tables.
