Problem

There is a problem with Model II Accounts Payable in the indexing of vendors. A zero is placed in the array that holds the record number for the vendor. This causes an error code 61 to occur.

Solution

The problem is corrected by following the steps listed below.

1. Backup the diskette(s) and make the changes on the Backup copy of the program.
2. In BASIC load the program by typing LOAD"APS/BAS".
3. Make the following corrections:

CHANGES (Retype the line or refer to the Edit section of the owners manual)

Old Line: 1722 IFW1>P1THENS1=-1

New Line: 1722 IFW1>P1THENS1=-1ELSEP1=P1-1

Old Line: 1726 IFW2>P2THENS2=-1

New Line: 1726 IFW2>P2THENS2=-1ELSEP2=P2-1

4. Type SAVE"APS/BAS" to save the changes in the program.
5. At TRSDOS Ready, make a backup copy of the corrected diskette.
