Problem

1. When doing a global Search and Replace under SCRIPSIT, if you specify a beginning page number greater than the highest page number in your document, SCRIPSIT will create the requested page and then proceed to fill up the document with empty pages.

2. If the first paragraph on a page had a line spacing of 2 and was locked, doing a Define Paragraph (ESC U D P) caused the system to lock up.

Solution

1. At TRSDOS READY, apply the following patches to correct the problem.

   ```
   PATCH SCRIPSIT A=D6A3 F=ØØØØØØØØØØØØØØØØØØ C=CDBECC3E95CØC312C5
   PATCH SCRIPSIT A=D6AC F=ØØØØØØØØØØØØØØØØ C=CDFBCCC5E3CDFBCC
   PATCH SCRIPSIT A=D6B4 F=ØØØØØØØØØØØØØØØØ C=E3C1B7ED42DØ3A6B
   PATCH SCRIPSIT A=D6BC F=ØØØØØØØØ C=84ØF3FC9
   PATCH SCRIPSIT/SYS R=71 B=2Ø3 F=12C5C294 C=A3D6C298
   PATCH SCRIPSIT/SYS R=72 B=89 F=B7ED4228 C=CDACD63Ø
   ```

2. At TRSDOS READY, apply the following patches to correct the problem.

   ```
   PATCH SCRIPSIT A=D69A F=ØØØØØØØØØØØØØØØØØØØØ C=2BCB7ECØ2BF5C3ØØE2
   PATCH SCRIPSIT/SYS R=42 B=1Ø F=2B2BF5 C=C39AD6
   ```

After the above patches have been applied, apply the following patch to change the date in the SCRIPSIT initialization screen (it should read 12/Ø4/1981 before you apply the above patches; if it does not, apply all preceding patches):

```
PATCH STARTUP A=E4ØE F=B1B2AFBØB4AFB1B9B8B1 C=BØB1AFBØB8AFB1B9B8B2
```

When this patch has been made, the SCRIPSIT initialization screen will show the date Ø1/Ø8/1982 at the bottom.
