Problem

When using variable length records in ISAM files, RSCOBOL always displays an error 97 when a WRITE record is attempted. Following the Error 97, COBOL returns immediately to TRSDOS READY. The Patch below will correct this problem.

Also, when using variable length records, the "OCCURS DEPENDING ON" clause must not be specified at level Ø1.

Solution

At TRSDOS READY, apply the following patches to correct the problem stated above.
