Radio Shack® CUSTOMER SERVICE BULLETIN

400 Atrium—One Tandy Center, Fort Worth, Texas 76102

Bulletin No.	4704-01
Description	COBOL RUNTIME
Model	Model II
Stock No.	26-4704 Version 1.3b
Date	April 7, 1982
Page 1 of	1

Problem

When attempting to add records to an indexed or relative file, Cobol improperly handles a disk full condition (error 24). The indices of indexed files are improperly changed. As a consequence, the next attempt to write a record produces an invalid index error (error 98).

At this point, the user can only revert to his most recent back-up copy, because the invalidated file cannot be recovered.

Solution

At TRSDOS READY, apply the following patches to correct the above problem.

```
PATCH RUNCOBOL A=761D F=3014FD7071FD717021 C=D021250019EB3E2CCF
```

```
PATCH RUNCOBOL A=7626 F=250019EB3E2CCF2804 C=2007FD7071FD7170C9
```
