Problem

When using THINLINE TRSDOS 2.0 with some thinline drives, ERROR 8 will occur when the drive is accessed. TRSDOS does not allow enough time to come up to speed before assuming a valid error has occurred. There is also an incorrect operator prompting for "DRIVE NOT READY" when running format.

* * THE FOLLOWING PATCHES ARE REQUIRED! * *

These patches are not valid for TRSDOS 2.0a.

After patches from this Bulletin have been applied, the version number will be 02.0B.01. Please make the necessary entry in your Version Log.
